Errata #2

Interagency Fire Program Management Qualifications Standard and Guide

Position: Prescribed Fire and Fuels Specialist, High Complexity

Reference: Pages 2-24 and 4-236, Interagency Fire Program Management Qualifications Standard and Guide

Minimum Qualification Standard: NWCG Incident Management Qualifications

Effective Date: April 5, 2005

This errata sheet defines a change in the “Prescribed Fire” qualification for a Prescribed Fire and Fuels Specialist, High Complexity.

The prescribed fire qualifications of “Prescribed Fire Burn Boss, Type 1 (RXB1) or Fire Use Manager (FUMA)” on pages 4-24 and 4-236 of the Interagency Fire Program Management Qualifications Standards and Guide are replaced with Prescribed Fire Burn Boss, Type 2 (RXB2).

Feedback from the field has indicated the majority of the prescribed burns being implemented do not require the RXB1, even on high complexity units. If a RXB1 is required one can be ordered.

Effective April 5, 2005 the NWCG Incident Management Qualifications for Prescribed Fire and Fuels Specialist, High Complexity are:

NWCG Incident Management Qualifications - Currency Required

Command: Incident Commander, Type 3 (ICT3)

AND

Operations: Task Force Leader (TFLD)

AND

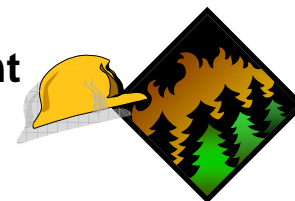

Prescribed Fire: Prescribed Fire Burn Boss, Type 2 (RXB2)

Replacement pages for the Interagency Fire Program Management Qualifications Standard and Guide (IFPM Standard) can be found on the IFPM website at: <http://ifpm.nifc.gov>.
